

TS/BRIEF-01

# EVERYTHING IS A SYSTEM.

A public brief for the infrastructure between intelligence  
and the physical world.

CONCEPT VISUALIZATION

No physical prototype, deployment, performance, customer, or certification claim is implied.

SYSTEM THESIS

# FROM INFORMAT TO PHYSICAL ACT

The Tetherics thesis is a control loop: observe an environment, construct an explicit state, reason under constraints, orchestrate dependencies, act through bounded interfaces, and use outcomes as new evidence.

01

## OBSERVE

Acquire events and sensor signals with timestamps and provenance.

02

## MODEL

Represent state, uncertainty, recency and system boundaries.

03

## REASON

Propose paths under policy, constraints and known evidence.

04

## ACT

Emit bounded commands with approvals, audit and recovery.

NATIVE 3D ASSET

# A REAL SCENE. A CLEAR STATUS.

TS-MACHINE-01 is a native SceneKit scene rendered offline through Metal at 3840 × 2160. It contains articulated geometry and physically based materials. Its public status remains concept visualization.

MASTER

3840 × 2160 / 24 FPS / 96 FRAMES

GEOMETRY

CHAMFERED CAD FORMS / 128-SEGMENT OPTICS

RIG

SHOULDER / ELBOW / WRIST / GRIPPER

MATERIALS

METAL / CERAMIC / RUBBER / OPTICAL / EMISSIVE

RENDER

APPLE METAL / SCENEKIT PBR / 4× MSAA

PROVENANCE

PUBLIC MANIFEST WITH SHA-256 DIGESTS

CONCEPT VISUALIZATION

EVIDENCE BOUNDARY

# TRUST REQUIRES

01

## LIVE

A publicly operating artifact or process that can be inspected.

02

## PILOT

A bounded evaluation with named scope and evidence.

03

## PROTOTYPE

A functional build without a production claim.

04

## SIMULATION

Modeled behavior, not real-world performance.

05

## CONCEPT

Design communication only.

06

## NOT DISCLOSED

No public evidence; no implication substitutes for it.

CURRENT PUBLIC DISCLOSURE

# WHAT IS NOT BEING CLAIMED.

LEGAL ENTITY / REGISTRATION

NOT DISCLOSED

NAMED LEADERSHIP

NOT DISCLOSED

CUSTOMER DEPLOYMENTS

NO PUBLIC EVIDENCE

PRODUCTION PERFORMANCE

NO PUBLIC EVIDENCE

SECURITY CERTIFICATION

NOT CLAIMED

PHYSICAL MACHINE PROTOTYPE

NOT CLAIMED

Interface telemetry in the cinematic experience is narrative UI. It is not a benchmark, field result, or safety assurance.

NEXT EVIDENCE GATES

# NEXT EVIDENCE

GATE / 01

## IDENTITY

Publish accountable leadership, legal entity and a verifiable contact boundary.

GATE / 02

## PROTOTYPE

Publish dated functional artifacts and a reproducible test environment.

GATE / 03

## SECURITY

Publish threat model, data scope, control ownership and assessment evidence.

GATE / 04

## OPERATIONS

Publish SLOs, failure tests, incident path and operating history.

GATE / 05

## OUTCOMES

Publish baselines, samples, periods, exclusions and named methodology.

GATE / 06

## INDEPENDENT REVIEW

Attach external evidence with dated scope and limitations.
